

Gracias

1. Give one player both Start Player cards.
2. Deal two cards face-up to each player.
3. Deal out triplets of one face-down and two face-up cards. The number of triplets dealt should equal the number of players.
4. Beginning with the Start Player, each player selects one triplet:
 - a. Look at the face-down card, and place it face-down in front of you.
 - b. Choose one of the face-up cards to keep, and place it face up in front of you.
 - c. Give the other face-up card to the player of your choice, who keeps it face-up. ("*Gracias*")
 - d. Face-up cards should be arranged by color, with the number of cards clearly visible.
5. When the last player has chosen the last triplet, pass the small Start Player card to the left.
6. Play four hands (steps 3-5), scoring after the last:
 - a. All players reveal their four face-down cards.
 - b. Any player with 5 or more cards in the same color puts 5 of them in a stack face-down.
 - c. The player(s) with the most face-up cards in each of the 6 colors must discard those cards.
 - d. Remaining face-up cards, and each face-down stack, count for one point.
 - e. Pass both Start Player cards to the player to the left of the player with the big Start Player card. Shuffle all cards and play again.
7. Play for three rounds. Highest total wins! Ties are broken by the largest score in a single round.
