

WHO IS REHAB GAMING USA

Where have the times gone of people talking and interacting face to face? Nowadays, it seems that everyone, from individuals, couples, to entire families, have their faces buried in a phone, tablet, or computer device. It can even be argued that society is teetering on losing the skill of face to face communication.

Rehab Gaming USA saw a need for a tool that could help game players break down the barriers of social interaction in a fun, personal way, by creating nonintimidating icebreaker questions that get people communicating face to face without technology.

Rehab Gaming USA is dedicated to creating playing card games that promote personal, unfiltered, genuine social interaction.

RULES

The first player picks from the cards lying face down on the table.

They read the question aloud and answer it. The questions are designed to create genuine conversation by asking open ended questions. The player has the option of going as deep into the question as they feel comfortable.

That player then chooses another player to answer the same question.

That second person discards the card and picks up another card and repeats the process.

If a “social card” is picked, all game players have to perform what is listed on the card.
